- (N52/E17)
1. Attached in the annex is a photostat copy of a plan of the Large Elbe Power Plant in Voekerode ~~which is now~~ which is now under construction and is scheduled to be completed by 1953.\*
  2. The attached plan is the official basis (Unterlage) for the 1951 construction plan of the plant. The plant will be equipped with 12 to 14 boilers. Four boilers are scheduled to be set up in 1951. According to source, the four boilers have a capacity of 50 tons of steam pressure per hour each. The four boilers are scheduled to operate two 5,000-kw turbines. \*\*
  3. The Department for Power Construction in the Ministry of Industry is responsible for supervising the planning and construction of the plant. The official in charge in this department is Marschewski (fnu) and his deputy is chief engineer Theuss (fnu). \*\*\*

25X1A

\*  Comment. The annex is composed of four sheets showing different sections of the plan, which could not be combined into a single diagram as the various sections are not drawn to the same scale.

25X1A

\*\*  Comment. In 1945, the reported plant had 6 steam boilers and 5 steam turbines and an installed capacity of 200,000 kw. The plant was completely dismantled in 1945 to 1946. The reconstruction of the power plant was scheduled under the Five-Year Plan of the Soviet Zone of Germany.
